## Crane Training School Regina

Crane Training School Regina - We provide industry relevant programs in our crane training school. The course will provide our trainees with learning results matching the present industry demands. Our small class sizes combine theory and hand-on experience. Our qualified, industry-experienced instructors provide real world expertise to help trainees to obtain valuable skills and knowledge in their chosen field.

Theory Programs

The feature elements included in the crane training school comprises information regarding regulations, inspection, power-line safety, and site hazards involved in crane operation. Trainees would acquire knowledge about load charts, rigging and hardware applications. Direct feedback and quizzes during the course will help trainees solidify their knowledge.

The theory topics consist of: Introduction to crane certification process; safety fundamentals for crane operators; rigging knowledge; crane operation knowledge; crane rigging charts; communications knowledge; load chart knowledge; crane set-up & pre-trip inspections, and crane maintenance and service.

Practical Programs

The practical training section of the crane training school emphasizes hands-on learning. This part of the course focuses on the identification and terminology of crane components. People training will have the opportunity to perform skills required for crane operating, signaling and rigging.

The topics included in the practical portion consists of: Identify crane functions and components; Learn crane terms; identify wire ropes and rigging; utilize remote control; identify regulations and documents for rigging and wire rope; pre-use check on crane; utilize radio and hand signals; carry out correct lowering and lifting of loads and carry out rigging methods.
