

## **Counterbalance Forklift License Regina**

Counterbalance Forklift License Regina - When operated by fully trained operators, forklifts could become a major asset for companies and firms. We can provide your staff a thorough training program that consists of all factors of operating a powered lift machinery. Counterbalance forklift training offers forklift operators with the knowledge and practical skills considered necessary to operate forklifts safely and efficiently. The program provides a combination of classroom theory, hands-on training and participant observation within a warehouse-type environment. Training could be customized and/or on site.

The course goes through the lift truck fundamentals, rules and regulations, parts, load centres and factors affecting stability. Procedures about the general operation of the forklift is taught, in addition to circle checks, startup, forward/reverse on level ground, shutdown, and operating around other individuals. Load handling subject matters consist of load pickup and placement, selection of loads, loading and off-loading trailers and load security and integrity. Participants would learn operational maintenance procedures, such as refueling and recharging. Safety issues within the workplace would be talked about. Participants will learn about the environmental conditions affecting the performance of the lift truck and be able to recognize potential hazards. Advanced training on propane handling could be incorporated.

Both employers and employees can deal with severe penalties if national and industry rules are not followed in the operation of forklifts. Employees who operate a forklift or reach truck should be well-informed concerning the rules concerning their safe operation. Training is recommended for anyone applying for work which needs forklift operation.

We provide in-class theory and hands-on training in personalized, small classes. Training options include entry level or refresher courses.
