Overhead Crane Ticket Regina

Overhead Crane Ticket Regina - The overhead crane is a common heavy machine used in industrial environments. This equipment is known as a bridge crane and consists of parallel runways spanned by a traveling bridge. The component that lifts materials is the hoist. The hoist travels along the bridge.

The overhead crane when used for manufacturing or maintenance applications would provide more efficiency compared to a mobile crane. This type of crane is also commonly used in the steel industry. Steel is handled by an overhead crane at each phase of the manufacturing process, from the time the raw materials are poured into the furnace until the finished coils are lifted onto trains and trucks.

Overhead cranes are also commonly utilized in the automobile business and paper business. The removal of heavy press rolls and other machinery at paper mills is performed using bridge cranes. Bridge cranes are utilized so as to install the heavy cast iron paper drying drums as well as other huge machinery used in paper mills.
