

Clark Forklift

Clark Forklift Forklift Training - Performing worldwide, there are at this time 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those operating in North America. Clark has five major lines of lift trucks across the world, making it one of the most expansive companies in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 particular components built for 20 distinctive designs of lift trucks and automated equipment. Your regional Clark Seller is your complete source for availability of all your components needs supplied by Clark Totalift.

Clark features a phenomenal Parts Distribution team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to provide the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Worldwide, Clark has one of the most amazing supplier support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of commitment to their consumers predominates the materials handling industry.

Clark proudly remains an innovative leader of the material handling industry, pioneering protection features such as the operator restraint system. This exceptional commitment to safety is currently a standard feature on every lift truck.

Clark has a unyielding goal to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its manufacturing facilities. Additionally, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant industry position.

Lean Production

Clark has preferred the extremely economical and advantageous structure of "Lean Production" for its assembly facilities and application of resources. This system was developed to acknowledge the most effective method of production plant stewardship and ensuring maximum efficiency. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Engine Design

Clark's product engineers and suppliers communicate together to improve the effectiveness and excellence of their merchandise while minimizing costs. The contemporary value engineering agenda combines modern product improvement and provides superior customer support and service within the industry.
